

BIZASTRA — Strategy. Elevation. Growth.

The All-in-One Business ERP Built for Modern Nepal & South Asian Businesses

What is Bizastra?

Bizastra is a cloud-based, full-suite **Enterprise Resource Planning (ERP) system** designed specifically for small and medium-sized businesses (SMBs) in Nepal and the broader South Asian market. It replaces the fragmented use of spreadsheets, paper ledgers, and disconnected software tools — bringing every critical business function into a single, intelligent, always-accessible platform.

The name itself says it all: *Biz* (Business) + *Astra* (Weapon/Tool in Sanskrit) — **your business weapon for strategy, elevation, and growth.**

Whether you run a trading company, manufacturing unit, retail store, or service business, Bizastra gives you real-time control over your entire operation — from purchasing goods to generating VAT-compliant reports — all from one place.

Why Bizastra? Why Does This Exist?

Most small and medium businesses in Nepal manage their accounts using:

- Handwritten ledger books
- Local desktop-only software (like Tally) with no cloud access
- Multiple disconnected Excel sheets
- No real-time visibility into cash flow, stock, or receivables

The result? **Lost time. Wrong numbers. Missed tax deadlines. Inventory chaos. Slow decisions.**

Bizastra was built to solve all of that — in one place, in the cloud, accessible from any device, at any time.

Core Features

1. Dashboard — Your Business at a Glance

- Real-time overview of Companies, Customers, Vendors, Items, Fixed Assets, and Bills
- Recent bill activity feed — see what's happening right now
- Quick-action buttons — create a new bill in one click
- At-a-glance financial pulse without opening a single report

2. Master Data Management

Centralized management of all your business entities:

- **Companies** — manage multiple business entities under one account
- **Warehouses** — multi-location inventory management with full warehouse configuration
- **Customers** — full customer profile, contact, and transaction history
- **Vendors** — complete vendor database with purchase tracking

- **Inventory (Items)** — product catalog with categories, pricing, units, stock tracking, and **RAG (Rack, Aisle, Grid)** precise warehouse mapping
- **Fixed Assets** — register and track all capital assets (machinery, vehicles, equipment)
- **Fixed Assets Register** — depreciation tracking and asset lifecycle management

3. Bills & Purchase Management

The complete purchase cycle from bill entry to payment:

- **All Bills** — searchable, filterable list of every purchase bill
- **New Bill** — create purchase bills with line items, taxes, discounts, and vendor details
- **Purchase Returns** — manage returned goods to vendors with proper debit notes
- **Delivery Challans** — generate and track delivery notes for goods dispatched
- **Consumptions** — internal stock consumption records for manufacturing/operations
- **VAT Register** — auto-generated, IRD-compliant VAT report with input/output tax breakdown

4. Sales Management

The complete sales cycle from invoice to collection:

- **Sales Invoices** — professional sales invoices with tax calculation
- **Sales Returns** — manage customer returns with credit notes

5. Receipt & Payment

- **Receipt Vouchers** — record money received from customers
- **Payment Vouchers** — record payments made to vendors or other parties
- Single unified view of all cash inflows and outflows

6. Cash & Bank Management

Complete financial account management:

- **Bank Accounts** — track multiple bank accounts with full transaction history
- **Petty Cash** — manage day-to-day small expenses
- **Loans** — track loan accounts, disbursements, and repayments
- **Fund Transfers** — record transfers between accounts

7. Accounting & Reporting

Professional double-entry accounting built right in:

- **Chart of Accounts (COA)** — fully customizable account structure (Assets, Liabilities, Income, Expense, Equity)
- **Journal Entries** — manual journal posting with debit/credit balancing
- **General Ledger** — detailed transaction history per account with running balance
- **Ledger Reports** — account-wise statement with date-range filtering

8. Knowledge Graph & Document RAG — Unique Data Intelligence

A one-of-a-kind feature not found in any other SMB ERP:

- **Schema Map** — visual interactive map of how all data entities relate to each other
- **Data Explorer** — browse live business data (companies, customers, bills, items) as an interactive

visual graph

- **Document RAG (Retrieval-Augmented Generation)** — upload your business policies, manuals, and documents directly to your secure knowledge base. Our AI automatically chunks, embeds, and searches these documents so you can "chat" with your own business policies instantly.
- One-click audit presets: *Overdue Debtors*, *Cash Flow Trail*, *Inventory Map*
- Node pinning, zoom/pan, path tracing between entities
- SVG export for reports and documentation
- Mobile-optimized card explorer for on-the-go data browsing

9. AI Chat Assistant

- Chat directly with your ERP data (customers, bills, inventory)
- Connects automatically to the **Document RAG** knowledge base
- Live database connection status

How Bizastra Saves Time

Task	Traditional Method	With Bizastra
Creating a purchase bill	15–20 min (manual entry, tax calc, filing)	< 3 min (smart form, auto tax)
Monthly VAT Report	2–4 hours (manual Excel compilation)	Instant (auto-generated VAT register)
Checking stock levels	Going to warehouse or checking registers	Real-time from any device
Tracking overdue payments	Manual follow-up through ledger books	One-click audit in Knowledge Graph
Managing multiple companies	Separate books for each company	Single login , switch instantly
Fixed asset depreciation	Manual calculation every year	Auto-tracked in assets register
Bank reconciliation	Comparing physical statements manually	Live transaction view per account
Finding a past invoice	Searching through paper files/folders	Instant search by bill number, vendor, date
End-of-day cash summary	Manual tallying	Real-time Cash & Bank dashboard

Estimated time saved per month: 40–80 hours for a business processing 100+ transactions.

What Makes Bizastra Unique?

1. Built for Nepal's Business Reality

- **VAT-compliant** reporting aligned with IRD (Inland Revenue Department) requirements
- **Nepali fiscal year** (B.S.) support alongside A.D. dates
- **INR/NPR** currency formatting baked in
- Understands the local tax structure — no configuration needed

2. Cloud-First, Always Available

- Works from any device — phone, tablet, laptop, desktop
- No software installation required
- Data is always backed up — never lose your books again
- Access your business from anywhere in Nepal or abroad

3. Truly Mobile-Friendly

- Fully responsive across all screen sizes
- Mobile-optimized bottom-sheet panels for inspecting data
- Touch-friendly pinch-to-zoom in the Knowledge Graph
- Card-based explorer mode for mobile data browsing
- Not an afterthought — designed mobile-first

4. Knowledge Graph (Industry First for SMBs)

No other small business ERP offers a **visual, interactive knowledge graph** that shows:

- How your companies connect to customers, vendors, and bills
- Live data relationships — not just schema diagrams
- Transaction audit trails in a visual, intuitive format
- One-click exploration of business data without writing a single query

5. Multi-Company, Multi-Warehouse

- Manage multiple businesses under one account
- Each company has its own books, vendors, customers, and inventory
- Multi-warehouse inventory tracking with location awareness
- Perfect for groups of companies, subsidiaries, or franchise operations

6. Secure & Role-Based

- Powered by **Supabase** — enterprise-grade PostgreSQL with Row Level Security
- Every user only sees data they're authorized for
- Auth-protected routes — unauthorized access is blocked by design

7. Modern, Premium UI

- Clean, distraction-free interface designed for speed
- Dark/light mode support
- Collapsible sidebar for maximum workspace
- Professional design that looks good in client-facing settings

Who Needs Bizastra?

Business Type	Pain Points Solved
Trading Companies	Purchase bills, sales invoices, inventory, VAT register
Manufacturing Firms	Consumption records, raw material tracking, fixed assets
Retail Shops	Customer management, sales invoices, cash tracking
Import/Export Businesses	Vendor management, challan tracking, multi-company
Service Businesses	Receipt/payment vouchers, ledger management
Group of Companies	Multi-company under one login, consolidated view

Problems Bizastra Eliminates

- Losing physical ledger books or registers
 - Manual VAT calculation errors and IRD penalty risk
 - Not knowing your actual cash/bank balance in real time
 - Excel sheets that don't match actual transactions
 - Desktop-only accounting software you can't access on the go
 - Separate software for inventory, billing, and accounting — all disconnected
 - No visibility into which customers owe you money
 - Manual depreciation calculations for fixed assets every year
 - Inability to track stock across multiple warehouses
 - No audit trail — can't trace where money came from or went
-

Business Impact

- **Faster billing** — get paid faster, improve cash flow
 - **Accurate VAT reports** — avoid IRD penalties and audit scrutiny
 - **Real-time visibility** — make informed decisions, not guesses
 - **Reduced accounting errors** — double-entry system catches mistakes automatically
 - **Better vendor/customer relationships** — always know who owes what
 - **Scalability** — grows with your business from 1 to 100+ employees
-

The Vision

Bizastra is not just software — it's a **business intelligence platform** that grows with your company. As your business scales, Bizastra scales with you. From a single trader to a group of companies, from one warehouse to ten, from manual VAT filing to real-time tax compliance — Bizastra is designed to be the **last ERP you'll ever need**.

"Stop managing your business with notebooks and Excel. Start running it with intelligence."

Get Started
